Correction--New Patent

We were misinformed last week in saying that Otto Groschner had received his severe burns from an ex-plosion of a gasoline stove. It was the soldering pot which exploded and made all the mischief.

By the way, it may be proper and in place to state that Mr. Groschner has just applied for a patent upon a gasoline stove of his own invention, which is said to be a vast improve ment over the present stoves in use It is highly spoken of by those who have examined the workings of the new invention. We wish Mr. G. success in his inventive venture and

mon enemy. We must recognize the gravity of the situation. It is now ess than a year since we were beaten in this state by nearly 140,000 plurali ty, nor was this a local disaster af fecting only the party in the state. We suffered from the Atlantic to the I wife and from the lakes to the guif. We were beaten in our strong-holds, as well as in doubtful places, and it is idle to talk of its being the fault of any one man, or any single act of the party, or any of the minor causes that effect political success. The shadow of the great world wide panic, the industrial and financial depression, low prices for all products, low wages, or no wages for workingmen everywhere, despair for farmer and mechanic, terror and ruin for bankers and merchants, and at the bottom of all a false tariff system running in turn manufacturer and consumer, and an unwise and fatally weak currency situation, had thrown over the whole nation's resentment against the party which happened to be in power when the disaster came. Millions of Democrats remained at home—hundreds of thousands of our own state—as a mute protest against the powerlessness of their president SPRINGFIELD, Aug. 21.—The convention of Democrats here to-day is tect them from these disasters. Men from all parties and everywhere were freely saying that the Democratic party was dead, dissolved, gone off into the camps of the Populists and the Socialists and has be wandering bands of fugitives, without union and without hope. The beneficence of Democratic legislation has already produced and is producing its effects. There is no human being whose judgment is entitled to the slightest weight who does not know that the gravity of the situation, and the immensity of the peril was averted by the repeal of the Sherman law. And the third, and in the Democratic heart the most desired, the repeal of the McKinley bill was secured against the greatest obstacles and the fiercest and bitterest opposition, and in its place was passed a Democratic tariff bill which will long stand as a law of the land.
